Re: Abel -Moody 230 KV Transmissions Project

Dear Sir or Madam,

As the Community Manager of Remington Heights HOA in Queen Creek, I am writing to protest the plans of SRP to install high tension power lines along Rittenhouse Road, or along any route that is in close proximity to our community. There types of power lines pose a significant threat to our community in the form of increased health issues, lower property values and a reduced quality of life for the members of our community.

We have informed the community of these plans, and to date have not had a single person out of 478 families speak out in favor of this plan! The overwhelming response is that our community will simply not tolerate this threat to their health, investment and lifestyle!

We therefore strongly urge you to take any steps in your power to stop these plans and to require SRP to either place the lines underground or to reroute them to a less densely populated area.

Please add me to you list of contacts when you distribute any information on public hearings or meetings regarding this issue, as many of our homeowners would like to attend and make their voices heard. You can reach me at sharonm@ogdenre.com or at 480-396-4567 Ext. 228.

Thank you for your consideration.

Best regards,

Sharon Mathers
Community Manager
